

PRESS RELEASE

17 May 2017

BK117 ROLE EQUIPMENT GRANTED FAA CERTIFICATION; CARGO HOOK AND MIRROR KIT

Airwork (NZ) Limited have obtained FAA Supplementary Type Certificate (FAA STC) for the MBB BK117-B2 BK117 Cargo Hook and Mirror Kit.

The BK117 Cargo Hook has a carrying capacity of up to 1200kg. It utilizes the Onboard Systems Cargo Hook with the option of either hydraulic or manual release and can be mounted to either an Airwork manufactured or OEM cargo sling. It comes with a stowage bracket for when not in use. The hydraulic release lever is installed on the collective.

The BK117 Cargo Hook Mirror Kit allows the pilot to view the cargo hook through the lower chin window for improved visibility when performing cargo hook operations. There are single or dual mirror options available and is a very light system.

Approvals – FAA, Transport Canada and CAANZ.

Airwork (NZ) Ltd is part of the Airwork Group of Companies which is a diversified aviation business operating in multiple countries providing maintenance support, dynamic component overhaul, turbine support, design, and manufacture. They are an authorized Service Centre for Honeywell, Breeze Eastern, Airbus Helicopters and Kawasaki. Airwork (NZ) Ltd carries global certification for FAA145, EASA145, NZCAA145, CASA PNG145.
